Dear colleagues,

It is our great pleasure to invite you to the Joint meeting The Fourth International Symposium on Neurocardiology, (Neurocard 2012) and The Third International Symposium on Noninvasive Electrocardiology, organized by Serbian Neurocardiological Society and Serbian Autonomic Society, and auspices of International Society for Holter and Noninvasive Electrocardiology (ISHNE), to be held in Belgrade on September 27th-29th, 2012.

The meetings *NEUROCARD 2009, 2010, 2011* and The First Educational Symposium on Noninvasive Electrocardiology, organized 2008, included participation of scientists from whole world, Europe and region and organized under the auspices of several international organizations. In order to improve scientific collaboration between experts from similar disciplines we decided to organize in the future joint meeting of Neurocard 2012 and Symposium on Noninvasive Electrocardiology with hope that this formula will be successful.

We hope that NEUROCARD will become a good platform for international scientific cooperation as well as good opportunity to develop friendship in the nice environment and pleasant atmosphere.

The progression of heart disease is associated with changes in the neurohumoral mechanisms that control cardiac function. Neurocardiology deals with the degree to which this neurohumoral remodeling occurs, even before overt signs of cardiac disease become manifest. With our cumulative understanding of these interdependent processes, new avenues for time-appropriate, targeted methods of treating heart diseases can be developed.

The Symposium will bring together medical researchers and specialists focused on the autonomic cardiovascular regulation in different fields such as cardiology, neurology, physiology, molecular biology, pharmacology, nephrology, endocrinology, psychology and engineering.

The purpose of the meeting is to endorse research in neurocardiology and related fields, especially noninvasive electrocardiology to improve prognosis and the outcome of cardiovascular disease and facilitate the dissemination of the state-of-the-art.

Outstanding experts, members of the Scientific Advisory Board will assure scientific excellence.

On behalf of the Organizing Committee,
Looking forward to welcoming you,

Branislav Milovanovic,
Professor of Internal Medicine and Cardiology
Chairman of the meeting
